Note regarding NAAMS Standard Components

While **Douglas Stamping Company** has always specialized in providing high quality shims, spacers and washers to a wide range of industry and end users, we also provide a variety of details and components used in automated welding machines and production equipment.

Most of these items are not cataloged, as they are part of readily available industrial standards. To find information on NAAMS/Auto Steel Partnership standard assembly and stamping components, go to <<http://a-sp.org>>, select Publications, then look down the page for the two online catalogs of standards. We provide all of the L-blocks, stop blocks, locating pins and retainers listed, most of the stub shafts, and many other components. Please contact us for price and availability. Examples of many of these items can be found on pages 59 and 60.

We also continue to provide obsolete FSD and Ford standard L-blocks, stop blocks and stub shafts, and are capable of producing special and custom components to print.
